

20 November 2023

Dear Families

Improvements to Online Safety Information Provided to Parents and Carers

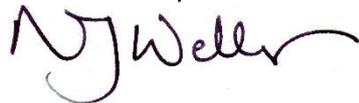

From 2024 Academy Transformation Trust will be issuing their own tailored Online Safety Newsletter to keep you fully updated on the latest news around Online Safety. This will be issued at key points throughout the year and will contain information, links and useful hints to help you navigate and keep your children safe online. The newsletter will be circulated via email as well as being shared on social media streams.

Providing our own online safety communications means that information can be tailored specifically to the needs of pupils in our academies as well as being aligned with online safety education being provided in school. Online safety information will also be collated on Academy websites so parents, carers and pupils will always have easy access to all newsletters as well as links to up-to-date online safety services and information.

This enhanced provision from ATT means that from December 2023, the Safer Schools App will no longer be available to parents, carers and pupils at ATT.

Should you require any support for online safety matters affecting your child please contact a member of the Academy's Safeguarding Team, who will be happy to help.

Yours sincerely

Sir Nick Weller  
CEO
